

**CNT 6519**  
**Individual Project**  
**Final Report**  
**Total points - 200**  
**Due Date 11/30/15 - 11:59 PM**

## **Tasks for this assignment**

**Term Paper:** You should select one of the two topics you selected for your research paper assignment. If you select a new topic, you must give me the details and get it approved by as soon as possible. You should select 5-6 good related technical papers in that topic. Your work involves an in depth study (can include experiments) on the topic and produce a report on your study. Points are assigned as follows:

- (1) A title reflecting the description of your work [10 points] and your name
- (2) Summary of your work [10 points]
- (3) Detail description of your work (if some experiments did not produce any result, include them also) [100 points]
- (4) A list of your references that you used for the project (Book, research paper, web page, software, and hardware) Provide complete reference [10 points]
- (5) Your thoughts and concluding remarks about your individual project [20 points]

In detail description for demonstration project you should have

Experimental set up

Steps for your demonstration

A video of demonstration

### **Power Point Presentation**

- (6) Provide a power point presentation of your project either with narration or a video. [50 points]

**You should upload the term paper, power point presentation and a video if there is any.**
